Education

Integrated Master's in Industrial Engineering and Management (16/20)

2015- 2021

University of Minho, Braga

Additional Certification

Excel: Excel/VBA for Creative Problem Solving; Excel Basic/Intermediate

Data Analysis: IBM Data Science Professional Certificate (6/10 completed)

Lean Six Sigma: Six Sigma Yellow Belt; Data Analytics for Lean Six Sigma

English: Cambridge Assessment English C1

Experience

Engineering Analyst

April 2022 - current

Sodecia - Czech Republic

- Designed a database about Customer Complaints and implementing in **SQL**.
- Development of Continuous Improvement projects: elimination of 100% inspection (-144 hours/year), analysis and reduction of setup time (estimated reduction: -13%) and batch size optimization.

Professional Internship in Industrial Engineering and Management

Sept. 2021- Jan. 2022

DST group - Portugal

- Conducted **internal audits** and provided lean solutions and training, to ensure quality and organization.
- Research and analysis of innovation projects in the post-construction: (1) analysis of causes and costs. of rework and (2) development of a preventive maintenance program.

Curricular Internship in Industrial Engineering and Management

Nov. 2019 - June 2020

Amorim Cork - Portugal

- Evaluation of the impact of a new maintenance activity on productivity, through a **VBA program**.
- Accomplished setup time reduction by 33% and defects reduction by 16% through **SMED** methodology, **parallel machines scheduling** and **andon** normalization.
- Established **autonomous maintenance** activities and developed **standard documents**.
- Reduced reprocessing costs of two products by 79% through machine improvement's.

Projects

Workflow improvement using Lean tools

Sept. 2019 – Nov. 2019

Refood 100% - Portugal

- Reduced non-value-added time by 9% by implementing a kanban.
- Workspace organization through **5s** methodology.

Analysis and improvement of Built-in System Interface area

Sept. 2018 – Jan. 2019

Aptiv - Portugal

- Reduced cycle time by 5% through **line balancing** and **simulation**.
- Prevention of workers health risks through the application of **ergonomic tools**: EWA, RULA and MAC.
